FEATURES

1. SMART STYLING . . .

2. LOW . . . enables user to look over it while interviewing or dictating.

Also eliminates exposure of lighted tube to the eyes of user and other persons in room.

3. FORWARD THRUST . . .

of lamp brings light source out over working area of desk or table yet base remains back where it belongs.

4. PERFORMANCE . . . .

functional shape of lamp plus engineered design of reflector liner in shade provides highest intensity of light ever produced in a single tube fluorescent desk lamp. This same design also causes excellent distribution of light intensity —

25 FOOT CANDLES 24 INCHES FROM BASE OF LAMP
50 FOOT CANDLES 18 INCHES FROM BASE OF LAMP
70 FOOT CANDLES 12 INCHES FROM BASE OF LAMP

5. CONSTRUCTION . . .

base and column are a single one piece casting. Adequately weighted against tipping over. None of the usual weaknesses encountered in the conventional lamps made of several assembled parts. All components and general construction are in accordance with the best electrical practices.
